

Laundry

Excellent cleaning performance, superior energy rating and very low water usage, powered by Smart Technology to provide you and your family with laundry solutions that are kind to the family, to your clothes and kind to the environment.

Washing Machines

Front Loader

Direct Drive Motor

The advanced brushless direct drive motor rotates the drum directly without a belt and pulley. As the power is delivered directly to the drum, unwanted vibrations and noises are minimized and energy consumption is optimized.

Air Bubble

Millions of air bubbles are forced into the wash cycle and increase the cleaning power when they penetrate the fibre on clothes. This reduces the amount of detergent needed, reduces the detergent residues and is very gentle on your clothes.

Opti-Wash Feature

A unique feature of Parmco's 7kg front loading washing machine is the Opti-wash. This feature is automatically activated on every selected cycle, giving you a great optimal wash result every time, as well as reduced water consumption and shorter cycle times.

Opti-wash is a special sensor that measures dirt and detergent levels in the water and automatically adjusts the cycle times to deliver an optimal wash.
