As part of Parmco Appliances commitment to improving and updating product ranges, we reserve the right to alter, change and update technical specifications and appearence attributes of all Parmco Appliances ovens, E&OE

Parmco Appliances extended 7 year warranty

The Warranty:

- This appliance is intended for domestic use in the owners' home. Use of the appliance for commercial purposes will limit the warranty period (please see Parmco website for commercial details).
- Subject to the terms and conditions contained within this
 warranty, if the product is not of Acceptable Quality (as
 defined in the Consumer Guarantees Act) within 7 years of
 the date of original purchase, then Parmco Sales undertakes
 to repair or, at it's sole discretion, replace the product.
- The warranty does not cover the costs of transport, mileage or travelling time if the product is located beyond 30km of a recognised Service Agent.
- This warranty is offered as an extra benefit, and does not affect other legal rights, which can not be modified or excluded by agreement.
- This warranty only applies to goods supplied and installed in the North and South Islands of New Zealand.
- The provisions of this warranty are in addition to the rights and remedies available to consumers under the Consumer Guarantees Act 1993.

Product	Date of purchase
Serial Number	
Dealer / Retailers Name	
Please retain this Warranty card together with receipt or other proof of purchase date when seeking service during the warranty period	

Please contact Parmco at 09 573 5678 if your appliance needs servicing under warranty. Please have your model number and proof of purchase ready. Warranty repairs must be authorized by Parmco.

Subject to updates without prior notice, please visit www.parmco.co.nz for the latest version.

p: 09 573 5678 f: 09 573 5699 e: sales@parmco.co.nz w: www.parmco.co.nz

The Warranty is not valid:

- If the product is not installed and operated in accordance with the operating instructions.
- If the product is not installed to comply with the electrical, gas, plumbing and other Regulations and Codes of Practice in New Zealand.
- If the product is operated on voltages or frequencies outside the normal range for domestic appliances in New Zealand.
- If the product is not used in normal domestic use, or if it is used in a business as defined in the Consumer Guarantees Act.
- · If any serial number has been removed or defaced.
- If proof of date of purchase is not supplied, except at the sole discretion of Parmco Sales. Proof of purchase can be for the product itself, or if installed with a kitchen or house then proof of purchase can be from a Parmco reseller of products supplied by Parmco.
- If the products are purchased in a second hand condition from other parties (including but not limited to TradeMe, Sella, etc.)

Liability under this warranty will not be accepted for:

- · Wear and tear caused by normal domestic use of the product.
- · Damage in transport.
- Damage caused to the product by neglect, abuse, negligence, wilful act or misuse.
- Any costs associated with the repair, replacement, removal or reinstallation of products installed in a damaged condition.
- Any defect caused by accident, misuse, neglect, tampering with or unauthorised modifications of the appliance or any attempt at internal adjustment or repair by any person other than an Authorised Service Agent.
- · Service calls that relate principally to the following:
- · Instruction on how to use the product.
- Repair or replacement of house fuses, electrical wiring, gas fitting or plumbing.
- · Normal or scheduled maintenance including blocked filters or ducting.
- · Consumable items such as light bulbs.
- · Any damage to hobs caused by spills when cooking.
- Any breakage or damage of glass items.
- Any damage caused by non recommended product used for cleaning, maintaining, lubricating or similar.
- Any aspect relating to the installation of the product, or damage caused during installation including blocked access for repair.
- Any third party (including reseller) or consequential loss or damage (direct or indirect) however arising.

E & O.E. 727626062017

GENERAL

Carefully read the following important information regarding installation safety and maintenance. Keep this information booklet accessible for further consultations.

The appliance has been designed as a exhausting version(external exhaust)or as a filter version(internal air recycle) cooker hood.

SAFETY PRECAUTION

 Take care when the cooker hood is operating simultaneously with an open fireplace or burner that depend on the air in the environment and are supplied by other than electrical energy, as the cooker hood removes the air from the environment which a burner or fireplace need for combustion.

The negative pressure in the environment must not exceed 4 Pa(4*10-5 bar).

Provide adequate ventilation in the environment for a safe operation of the cooker hood.

Follow the local laws applicable for external air evacuation.

2. WARNING!!

In certain circumstances electrical appliances may be a danger hazard.

- A) Do not check the status of the filters while the cooker hood is operating
- B) Do not touch the light bulbs after appliance use
- C) Flambe cooking is prohibited underneath the cooker hood
- D) Avoid free flame, as it is damaging for the filters and a fire hazard
- E) Constantly check food frying to avoid that the overheated oil may become a fire hazard
- F) Disconnect the electrical plug prior to any maintenance.
- G) If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

INSTALLATION INSTRUCTIONS

.Electric Connection

The appliance has been manufactured as a class II, therefore no earth cable is necessary.

The connection to the mains is carried out as follows:

BROWN=L line

BLUE=N neutral

If not provided, connect a plug for the electrical load indicated on the description label. Where a plug is provided, the cooker hood must be installed in order that the plug is easily accessible.

An omnipolar switch with a minimum aperture of 3 mm between contacts, in line with the electrical load and local standards, must be placed between the appliance and the network in the case of direct connection to the electrical network.

The appliance must be installed at a minimum height of 650mm above electric hob and 750mm above gas hob.

If a connection tube composed of two parts is used, the upper part must be placed outside the lower part.

Do not connect the cooker hood exhaust to the same conductor used to circulate hot air or for evacuating fumes from other appliances generated by other than an electrical source.

ATTENTION: should the lamps not work, make sure they are well tightened.

MOUNTING OF THE HOOD IN THE LOWER PART OF AN HANGING CUPBOARD

Drill 4 holes of 6mm.diameter at the bottom of the hanging cupboard as showed in the drawing fig.1.

Fit the hood in the cabinet with 4 screws, which are appropriate to that kind of cupboard.

The appliance is provided with 2 air outlets, one which is in the upper part and the other on the back. Both of them can be used according to your requirements. A connecting ring ©, which to join the connecting pipe to , and a cover(A)to close the air outlet, which is not used, are supplied.

MOUNTING OF THE HOOD ON THE WALL

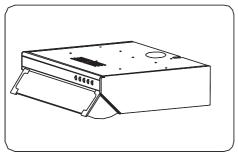

Drill 4 holes on the wall, which correspond to the position(B-Z)of the drawing fig.1.

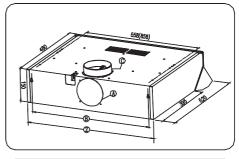

Hang the hood on the 2 holes by using the screws and dowels with expanding plug, which are appropriate for that kind of wall (ex.concrete, plasterboard etc.)

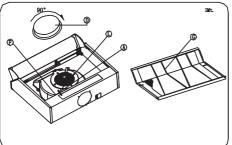

Fix definitely the hood through the 2 security holes (Z).

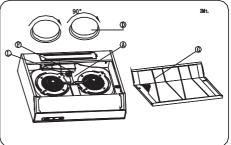

CHANGING FROM EXHAUSTING HOOD TO FILTERING ONE

.In order to make this change, demand a set of carbon filters to your dealer. Active carbon filters are necessary to depurate the air, that will be released in the room. Filters are not washable; they cannot be regenerated and have to be replaced at most every 4 months. The saturation of the activated charcoal depends on the more or less prolonged use of the hood, on the type of cooking and on the regularity of cleaning the grease filter. The filter(D)has to be applied to the aspirating group, which is inside the hood hiting the centre of the group with it and turning it of 90 degrees until the stop click is heard to lock it. Remove the grill(G)to carry out this operation. Close with the appropriate covers the upper and back air outlets; turn the small lever (L)from the position(A)to the position(F).In this way the hood is ready for the filtering function.

USE AND MAINTENANCE

.It is recommended to operate the appliance prior to cooking.

It is recommended to leave the appliance in operation for 15 minutes after cooking is terminated in order to completely eliminate cooking vapours and odours.

The proper function of the cooker hood is conditioned by the regularity of the maintenance operations, in particular, the active carbon filter.

.The anti-grease filters capture the grease particles suspended in the air, and are therefore subject to clogging according to the frequency of the use of the appliance.

In order to prevent fire hazard, it is recommendable to clean the filter at a maximum of 2 months by carrying out the following instructions:

- -Remove the filters from the cooker hood and wash them in a solution of water and neutral liquid detergent, leaving to soak.
- -Rinse thoroughly with warm water and leave to dry.
- -The filters may also be washed in the dishwasher.

The aluminium panels may alter in colour after several washes. This is not cause for customer complaint nor replacement of panels.

.The active carbon filters purify the air that is replaced in the environment. The filters are not washable nor re-useable and must be replaced at maximum every four months. The saturation of the active carbon filter depends on the frequency of use of the appliance, by the type of cooking and the regularity of cleaning the anti-grease filters.

.Clean the fan and other surfaces of the cooker hood regularly using a cloth moistened with denatured alcohol of non abrasive liquid detergent.

THE MANUFACTURER DECLINES ALL RESPONSIBILITY FOR EVENTUAL DAMAGES CAUSED BY BREACHING THE ABOVE WARNINGS.
