

Installation and Operating Instructions

MODEL:

R6W-501-1

R6S-501-1

Dear Valued Customer,

Thank you and congratulations on purchasing your new Parmco appliance.

All Parmco products are made to the highest quality and design standards. We are sure you will enjoy your new appliance.

As a note, please read through these instructions carefully, as these will assist you in gaining a complete understanding of the functions and features offered by your appliance.

Please take special note of all detailed technical information and installation instructions. It is essential that you only allow a qualified technician to install this appliance to ensure the safety and reliability of this appliance.

Furthermore, not using appropriate personnel to install this appliance may affect any future warranty claims lodged, so please check with Parmco Appliances before any installation is carried out.

We hope you enjoy your new appliance. If you would like to find out more about this product or any other products in Parmco's extensive range, visit us on the web at www.parmco.co.nz.

Regards,
The Parmco Team

IMPORTANT SAFETY INFORMATION

For best performance and to extend the life of your appliance we recommend that you read the instructions in this owners manual thoroughly before using your new appliance. It will provide you with all the information you need to ensure its safe installation, proper use and maintenance. Retain this owners manual for future reference.

BEFORE USING THIS APPLIANCE

Read the instructions thoroughly

- Remove all plastic protective films on the appliance before operating the appliance.
- The brackets and screws to fix this canopy to the wall are provided and are fixed to the inside packaging. Please check that the brackets and screws are not discarded with the packaging.

Installation

The appliance can be used as a canopy hood or can be mounted beneath a **wall cupboard** and is suitable for use as an exhaust hood or as a recirculating hood; if an exhaust facility (an exhaust duct or a ventilating shaft) is available, then we recommend the hood be installed as an exhaust hood for then, most of the smells and vapours that arise when cooking or frying can be almost completely removed from the kitchen.

Fastening the cooker hood on the wall:

Step 1: The canopy should be placed at a minimum distance of 65cm above the cooking surface when placed above an electric hob and a minimum of 75cm above the cooking surface when placed above a gas cooktop.

Step 2: To install, drill 4 holes of 8mm along a level line at the desired height. This line will hold the bracket that holds the canopy to the wall. Insert the screws into the holes and fasten securely to the wall, ensuring that the screws fix into material that has sufficient load capacity to hold the weight of the canopy.

Step 3: Insert the plugs into the holes.

Step 4: Drive in the wall plugs and screw in the screws tight.

Step 5: Place the cooker hood onto the fixed screws.

Step 6: Then use the attached accessories with the goods to turn the screws into the two holes of inside the hood, and then fix the screw to tighten the hood onto the wall.

Step 7: Put the one way valve onto the cooker hood.

Fastening the cooker hood beneath a wall cupboard (ensure that the cupboard can support the weight of the hood).

Step 1: The canopy should be placed at a minimum distance of 65cm above the cooking surface when placed above an electric hob and a minimum of 75cm above the cooking surface when placed above a gas cooktop.

Step 2: To install, drill 6 holes of 4mm at the bottom of the hanging cupboard.

Step 3: Put the one way valve on the cooker hood, then install the cooker hood on the bottom of the cupboard, tighten the hood with enclosed 6 screws.

Step 4: Install the adjusted board on the bottom of the hood in order to keep out the gap between hood back and cupboard.

Installation of kitchen ventilation over electrical and gas cooktops must be undertaken in full accordance and reference to the relevant NZ building standards.

Safety Information

- This appliance is designed for non-commercial, household use only and must not be altered in any way.
- This appliance can only be used safely when it is correctly connected to an efficient earthing system in compliance with New Zealand Electrical Standards requirements.
- Before maintenance or cleaning always ensure that the appliance is disconnected from the mains.
- Packaging items such as plastic bags, polystyrene, nails etc that this appliance is delivered in are potentially dangerous, and therefore appropriate measure must be taken to prevent children from coming into contact with them.
- This appliance must only be used by adults. Make sure that children do not touch the controls or play with the appliance. Young children should be supervised to ensure they do not play with the appliance.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning the use of this appliance by a person responsible for their safety.
- The exposed parts of this appliance heat up during the cooking process and remain hot for some time afterwards, even after it has been switched off. Keep children well away during operation and while the unit is cooling down.
- Do not do any flambé cooking underneath the hood.
- When frying, never leave the pan alone because the cooking oil could flare up.
- Keep the appliance thoroughly cleaned. Residues may cause fire risks.
- DO NOT use a steam cleaner to clean this appliance.
- Avoid improper or dangerous use of this appliance.
- Do not obstruct the ventilation or heat dissipation slots.
- This appliance is intended for indoor use only. Avoid exposing the appliance to atmospheric elements such as direct sunlight and rain.
- If the supply cord is damaged, it must be replaced by the manufacturer or a service agent or a similarly qualified person.

Use and Care

For best result, turn the cooker hood on 15 min prior to your cooking. Once cooking is finished, leave the appliance on for 15 minutes to completely eliminate cooking vapours and odours.

Step 1: Connect the plug into the main power supply.

Step 2: Push the switch ① into “I”, the lamp be on; push into “0”, the lamp be off.

Step 3: Push the switch ② into “1、2、3”, the fan will be on “low、mid、high” three, push “0” to turn the fan of.

Exhaustion

Outdoor exhaust version: Turn the adjuster to outdoor mode (see pic 3A), install the outlet, open the cooker hood, the smoke will be vented from the outside outlet.

Indoor exhaustion version: Turn the adjuster to indoor mode (see pic 3C), install the outlet cover, open the cooker hood, the smoke will be vented from inside vent.

Remark: The filter mat is flame retardant.

MAINTENANCE

In order to prevent fire hazard, it is recommendable to replace or clean (if permissible) the filter every 1-2 months. Acrylic filters cannot be washed, whereas aluminium filters can be washed by carrying out the following instructions.

- Unplug before cleaning, then remove the filters from the cooker hood and wash them in a solution of water and neutral liquid detergent, leaving to soak.
- Rinse thoroughly with warm water and leave to dry.

- The filters can be washed in the dishwasher, however different detergents have different caustic content and the aluminium filters may alter in colour.
- It can be washed at more or less frequent intervals depending on how often the hood is used.

- Clean the surfaces of the cooker hood regularly using a cloth moistened with denatured alcohol or non abrasive liquid detergent.
- Keep the motor and other spare parts free from water, as this will cause damage to the appliance.
- There is a fire risk if cleaning is not carried out in accordance with the instruction.

Parmco Appliances

2 year warranty

The Warranty:

- Subject to the terms and conditions contained within this warranty, if the product is not of Acceptable Quality (as defined in the Consumer Guarantees Act) within 2 years of the date of original purchase, then Parmco Sales undertakes to repair or, at its sole discretion, replace the product.
- The warranty does not cover the costs of transport, mileage or travelling time if the product is located beyond 30km of a recognised Service Agent.
- This warranty is offered as an extra benefit, and does not affect other legal rights, which can not be modified or excluded by agreement.
- This warranty only applies to goods supplied and installed in the North and South Islands of New Zealand.
- The provisions of this warranty are in addition to the rights and remedies available to consumers under the Consumer Guarantees Act 1993.

The Warranty is not valid:

- If the product is not installed and operated in accordance with the operating instructions.
- If the product is not installed to comply with the electrical, gas, plumbing and other Regulations and Codes of Practice in New Zealand.
- If the product is operated on voltages or frequencies outside the normal range for domestic appliances in New Zealand.
- If the product is not used in normal domestic use, or if it is used in a business as defined in the Consumer Guarantees Act.
- If any serial number has been removed or defaced.
- If proof of date of purchase is not supplied, except at the sole discretion of Parmco Sales. Proof of purchase can be for the product itself, or if installed with a kitchen or house then proof of purchase can be from a Parmco reseller of products supplied by Parmco.

Liability under this warranty will not be accepted for:

- Wear and tear from normal domestic use.
- Damage in transport.
- Damage caused to the product by neglect, abuse, negligence, wilful act or misuse.
- Any defect caused by accident, misuse, neglect, tampering with or unauthorised modifications of the appliance or any attempt at internal adjustment or repair by any person other than an Authorised Service Agent.
- Service calls that relate principally to the following:
 - Instruction on how to use the product.
 - Repair or replacement of house fuses, electrical wiring, gas fitting or plumbing.
- Wear and tear caused by normal use of the product.
- Normal or scheduled maintenance including blocked filters or ducting.
- Consumable items such as light bulbs.
- Any damage to ceramic glass hobs caused by spills when cooking.
- Any breakage or damage of glass items.
- Any damage caused by non recommended product used for cleaning, maintaining, lubricating or similar.
- Any aspect relating to the installation of the product, or damage caused during installation.
- Any third party (including reseller) or consequential loss or damage (direct or indirect) however arising.
